

Parental Notification of Student Screening for Behavior

Canyons School District regularly conducts universal screening in core academic areas and behavior areas to assist in identifying students who may be in need of additional support. Universal screening is the least intensive level of assessment completed within our Multi-Tiered System of Supports (MTSS) and helps educators and parents identify students early who might be “at-risk” for developing learning, behavior and/or social-emotional challenges.

The Student Risk Screening Scale (SRSS-IE) is a checklist of observable behaviors that is completed by your student’s teacher three times each year, October, January and April. If your student scores in the high risk range, additional consideration will be given to determine whether intervention may be provided on condition of your approval as parent/guardian.

Copies of the SRSS-IE are available for your review in the school office, should you desire to do so. If, after reviewing the SRSS-IE, you have questions/concerns about your student’s participation, please contact your student’s principal. If, after reviewing the SRSS-IE, you decide that you do not want your student to receive the screening, please contact your student’s principal to receive an opt-out form, which will need to be submitted to your student’s school.

Thank you for your willingness to assist our school in building a system of student supports that allow the school to respond more effectively to student’s academic and behavioral needs.
